

Relevant Solutions Announces Acquisition of Conrad Kacsik Instrument Systems

Strategic acquisition continues vertical integration of thermal-process engineering, testing, and calibration services across North America.

HOUSTON, TX – September 9, 2026 – Relevant Solutions, LLC (Relevant), a national provider of industrial equipment, engineering, and technical services, announced today that it has acquired **Conrad Kacsik Instrument Systems**, based in Solon, Ohio. The transaction closed on September 4, 2026.

The acquisition represents Relevant Solutions’ second add-on since partnering with **Fusion Capital Partners** in 2025, following the acquisition of Automation Werx earlier this year, and reflecting Relevant’s growing acquisition momentum. The addition of Conrad Kacsik strengthens Relevant’s Combustion Solutions offering by adding specialized thermal processing control system engineering, testing, and calibration capabilities. It also significantly expands Relevant’s instrumentation calibration and metrology capabilities, complementing the specialized services provided by **J&W Instruments and Loy Instrument**.

Founded in 1977, Conrad Kacsik has decades of experience supporting customers in demanding, highly regulated industries — including aerospace and defense, automotive, medical, and forging — where thermal-processing accuracy and standards such as AMS2750, Nadcap, CQI-9, and CFR-21 are mission-critical. The company operates an ISO/IEC 17025:2017 accredited calibration laboratory (through A2LA), providing traceable calibration and documentation for the most demanding quality and compliance requirements.

“The addition of Conrad Kacsik further strengthens Relevant’s ability to support customers across the full lifecycle of their thermal processing and combustion systems,” said John Carte, CEO of Relevant Solutions. “Their engineering, testing, calibration, and compliance expertise is highly complementary to the capabilities we have built across Relevant, particularly within our Combustion Solutions pillar. This combination allows us to bring together even more of the specialized expertise our customers need to improve performance, reliability, and compliance.”

By bringing these complementary capabilities together, Relevant can provide customers operating in highly regulated and technically demanding environments with broader access to controls, combustion, instrumentation, thermal processing, testing, and calibration expertise.

“Joining Relevant Solutions provides Conrad Kacsik with the resources and scale to continue serving our customers while expanding what we can offer them,” said Chris Miller, CEO of Conrad Kacsik Instrument Systems. “Our team has built strong relationships

with customers by providing specialized technical expertise and responsive service. We are excited about the opportunity to build on that foundation as part of Relevant.”

To support continuity for customers, employees, and partners, Chris Miller will remain with Conrad Kacsik, working closely with the Relevant team through the integration and expansion. Conrad Kacsik’s team will join the Relevant “Family of Companies”, ensuring continuity of the service and technical expertise its customers rely on, while gaining access to broader resources and solution offerings.

With the addition of Conrad Kacsik, Relevant Solutions continues to expand its technical capabilities and strengthen its position as a solutions-focused industrial partner. By combining engineering, automation, combustion, thermal processing, instrumentation, calibration, and technical field services, Relevant is expanding its ability to help North American customers address complex operational challenges while improving safety, reliability, efficiency, and compliance.

About Conrad Kacsik Instrument Systems

Conrad Kacsik Instrument Systems is a thermal processing and industrial furnace solutions provider headquartered in Solon, Ohio. Founded in 1977, the company specializes in thermal processing control system engineering and system integration. The company provides pyrometry services including calibration, temperature uniformity surveys, and system accuracy testing; metrology services; as well as process certification and validation, training, consulting, and related field services. Conrad Kacsik supports customers across demanding industrial applications and operates an in-house calibration laboratory that is ISO/IEC 17025:2017 accredited by A2LA. About Relevant Solutions

Relevant Solutions, LLC was formed in 2010 with the acquisition of Wilson Mohr, a company founded in 1965 and the first Honeywell thermal channel partner in the U.S. Building on deep expertise in burner management and critical thermal solutions, Relevant has expanded organically and through acquisitions into a broader portfolio of engineered products, services and solutions. Today, Relevant supports customers from more than 30 U.S. locations with additional sales coverage across 30+ territories, serving markets including renewable energy, alternative fuels, semiconductor, refining, chemical/petrochemical processing, OEM, food processing, upstream oil & gas, and municipal. Core offerings include instrumentation and automation, rotating equipment, purification, hybrid heating, and thermal equipment. For more information, visit relevantsolutions.com.

About Fusion Capital Partners

Fusion Capital Partners is a Los Angeles-based private equity firm pursuing control-oriented investments within the industrials sector, targeting a specialized set of business models providing engineered products and services to a defined set of end markets. As a growth and relationship-driven firm, Fusion is focused on building market-leading companies by driving value creation through both organic initiatives and strategic M&A, increasing both the scale and operational excellence of its partner companies.
