Tavoron Expands Industrial Automation and Robotics Capabilities with Acquisition of Power Motion

Transaction further expands Tavoron's Automation Distribution segment and represents the company's sixth add-on acquisition since its partnership with Fusion Capital Partners.

Eagan, Minn. – September 14, 2026 — Tavoron, a national leader in industrial automation, robotics, compressed air, motion control, and engineered solutions, today announced the acquisition of Power Motion, an established industrial automation solutions provider and systems integrator headquartered in the St. Louis, Missouri, area. The acquisition strengthens Tavoron's automation, robotics, machine vision, and motion control offerings and expands its geographic reach throughout the Midwest and South-Central United States.

Power Motion serves manufacturers and industrial operations as a full-service automation solutions provider, combining product distribution with value-added systems integration. The company specializes in factory automation and industrial robotics, machine vision, motion and servo control, programmable logic controllers (PLCs), safety systems, and pick-to-light solutions, supported by in-house engineering, programming, control panel fabrication, technical training, and on-site service. Power Motion's Systems Group has been solving industrial automation challenges since 2006, backed by more than 180 years of combined team experience. In addition to its St. Louis headquarters, Power Motion operates offices in Kansas City and Little Rock, Ark., serving customers across Missouri, Kansas, Arkansas, Nebraska, and southern Illinois.

The acquisition of Power Motion supports Tavoron's strategy to deliver integrated, end-to-end automation solutions that combine mechanical, electrical, control, and robotic technologies. By incorporating Power Motion's product offering, systems integration capabilities, and technical experience, Tavoron further enhances its ability to serve OEMs, manufacturers, and industrial facilities seeking modernized, efficient production systems.

"Power Motion brings a strong reputation for technical knowledge, customer service, and trusted product and engineering expertise; qualities that align directly with Tavoron's mission to elevate industrial operations across North America," said Nicholas Martino, CEO of Tavoron. "This acquisition expands our automation and robotics portfolio and strengthens our presence in the Midwest and South Central regions, allowing us to bring even more comprehensive solutions to our customers."

"We are excited to join Tavoron and bring our customers access to a wider array of technologies, services, and engineering resources," said Chris Tremblay, president of

Power Motion. "Our team remains committed to delivering the same responsive support and value-added solutions we're known for, now backed by an even broader platform."

Power Motion will continue operating from its St. Louis headquarters along with its Kansas City and Little Rock offices, maintaining its local teams, customer relationships, and high-touch service model. The company will integrate into Tavoron's broader automation business while continuing to deliver the reliable products, engineering, and support its customers depend on.

About Tavoron

Tavoron, a Fusion Capital Partners portfolio company, is a leader in manufacturing automation and industrial systems, offering the most comprehensive range of automation solutions and services to increase efficiency, improve production quality and create safer work environments. Our innovative technologies — including electrical and air automation, robotic systems, and compressed air technology — are backed by our collaborative business approach and a strong commitment to customer satisfaction. This unique combination positions us to deliver breakthrough technology solutions with lasting value to our customers.

Headquartered in Eagan, Minnesota, Tavoron is comprised of a diverse group of 14 companies and employs approximately 450 dedicated team members across the United States and Canada. To learn more about how we are Redefining the Possibilities of Automation, visit www.tavoron.com.
